PROFILE SUMMARY

SUMMARY Informatics Engineering graduate from Universitas Kristen Satya Wacana with a strong focus on software engineering, particularly web development and cloud-based systems. Experienced in developing a Pension Fund Information System covering general ledger, financial reporting, journal processing, and balance reconciliation to ensure accounting accuracy and compliance. Proficient in, JavaScript, Typescript, and PHP, primarily working in Linux-based environments with cross-platform experience in Windows. Driven by strong curiosity, continuous learning, and collaborative professionalism, with a deep passion for system design and building scalable, efficient architectures that maximize project impact.

TECHNICAL SKILLS

Code Review & Debugging	Client Interaction
Testing & Troubleshooting	Agile Methodology
Technical Documentation	System Architecture & Modular Design
Cross-Platform Development	Linux-Based Server Deployment & Configuration
Controller-Based Architecture	Software Testing

PROJECT EXPERIENCES

DAPENSE	July 2024 – December 2025
Developed a web-based financial system using Laravel, Javascript, PHP, MySQL, and Nginx, covering General Ledger, Journal Processing, Cash & Bank Transactions, Financial Reporting, and Balance Reconciliation. Engineered relational database schemas and modular backend architecture to ensure transactional integrity and audit traceability. Implemented automated journal posting, reconciliation logic, and role-based access control (4 roles via middleware). Optimized MySQL queries and indexing strategies to improve financial report generation performance. Deployed the application on a Linux server using Nginx with structured documentation and version control practices.	

KEY ACHIEVEMENTS

Dana Pensiun Sekolah Kristen Salatiga	July 2024 – December 2025
Fullstack Web Developer	
Migrated a legacy VDOS-based system into a modern web-based platform, improving operational efficiency by approximately 30–40%. Collaborated directly with finance stakeholders to translate accounting workflows into scalable system features. Reduced manual input errors by approximately 25–30% through structured UI/UX redesign and validation controls. Applied iterative Agile cycles (1–2 week sprints) with stakeholder evaluation and feature refinement. Conducted system testing (unit, integration, UAT) to ensure production reliability and stable deployment.	

FTI UKSW

Teaching Assistant - Web Developer

August 2024 – December 2024

- **Managed** and supported 4 web development classes with **100+** students in debugging and applied problem-solving.
- **Delivered** structured instruction fundamentals on HTML, CSS, PHP, and MySQL Database.
- **Reviewed** 400+ coding assignments, ensuring progressive improvement in logic, structure, and best practices.
- **Standardized** evaluation criteria to maintain grading consistency across multiple classes.

HMPTI (Himpunan Mahasiswa Program Studi S1 TI)

Teaching Assistant Coordinator

January 2023 - November 2023

- **Led** and supervised **20+** teaching assistants across multiple Informatics Engineering courses.
- **Monitored** academic delivery in classrooms and laboratories to maintain instructional quality.
- **Analyzed** student feedback and assistant performance metrics to recommend continuous improvements.
- **Established** coordination frameworks to improve communication efficiency among assistants.

COURSE & CERTIFICATION

-
- | | |
|---|-------------|
| • <i>Database Design and Programming with SQL by Oracle Academy</i> | 2023 |
| • <i>Belajar Menjadi Full Stack Web Javascript Developer by ITBOX</i> | 2026 |

EDUCATION

Universitas Kristen Satya Wacana

2021 – 2025

- Informatics Engineering – 3.64
