

Kevin Van Diesel Chansa

Full Stack Engineer | Laravel, Golang & PostgreSQL

Semarang, Indonesia | 081258168449 | kevinvandieselchansa@gmail.com | [Linkedn](#) | [Portfolio](#) | [Github](#)

PROFILE SUMMARY

Informatics Engineering graduate with 1 year and 5 months of hands-on experience in backend and full-stack development, including the development and maintenance of a financial information system. Experienced in translating business requirements into technical solutions, designing relational databases, developing RESTful APIs, conducting UAT, and supporting production systems using Laravel, PHP, MySQL, Golang, and PostgreSQL. Strong foundation in backend architecture, authentication, RBAC, testing, Git, and Docker. Currently expanding my Python and Odoo knowledge to transition into ERP development and business system implementation.

TECHNICAL SKILLS

- **Languages:** PHP, Golang, Python, JavaScript, TypeScript, Tailwind
- **Frameworks & Libraries:** Laravel, Gin, Hono, Vue.js, React
- **Backend & APIs:** RESTful API, API Integration, JWT, RBAC, OpenAPI
- **Databases:** PostgreSQL, MySQL, Database Design & Normalization, ERD Modeling, Indexing & Query Optimization
- **DevOps & Tools:** Linux, Docker, Nginx, Git, Postman, Figma
- **Testing & Debugging:** PHPUnit, Playwright, Laravel Debugbar, Chrome DevTools
- **AI-Assisted Development:** OpenCode, Cursor, ChatGPT, Codex, Claude

WORK EXPERIENCE

Full Stack Web Developer Intern | DAPENSE

Dana Pensiun Sekolah Kristen Salatiga | July 2024 – December 2025

[Docs](#)

- **Collaborated** directly with accounting stakeholders to analyze business processes, gather requirements, and translate them into technical solutions for **General Ledger, Journal Processing, Cash & Bank, Financial Reporting, and Balance Reconciliation** modules.
- **Developed** and maintained the DAPENSE pension-fund accounting system end-to-end, covering database design, backend development, **RESTful APIs**, validation, testing, deployment, and production maintenance using **Laravel, PHP, MySQL, Nginx, and Ubuntu Linux**.
- **Designed** relational database structures and implemented data validation, role-based access control, and structured workflows to improve operational efficiency by **30–40%** and reduce manual input errors by **25–30%**.
- **Conducted** UAT with accounting stakeholders, investigated and resolved functional issues, incorporated feedback through Agile iterations, and prepared technical documentation to support production operations and maintenance.

Teaching Assistant - Web Developer

FTI UKSW | August 2024 – December 2024

- Supported 4 web development classes with **100+ students** in debugging, programming, and applied problem-solving.
- **Taught** HTML, CSS, PHP, JavaScript, and MySQL through practical web development sessions.
- Reviewed **400+ coding assignments**, providing feedback on programming logic, structure, and best practices.

Teaching Assistant Coordinator

HMPTI (Himpunan Mahasiswa Program Studi SI TI) | January 2023 - November 2023

- **Led** and supervised **20+ teaching assistants** across multiple Informatics Engineering courses.
- **Monitored** academic delivery in classrooms and laboratories to maintain instructional quality.
- **Analyzed** student feedback and assistant performance metrics to recommend continuous improvements.

SELECTED PROJECTS

Inventra

Golang, Gin, PostgreSQL, Docker, JWT

[Docs](#)

- Designed and developed a modular inventory management system using Golang, Gin, PostgreSQL, and Clean Architecture, with focus on reliable API and database workflows.
- Tested critical inventory edge cases and concurrent transactions, implementing atomic transactions and row-level locking to prevent race conditions, inconsistent stock states, and overselling.
- Implemented JWT authentication, RBAC, validation, audit logging, pagination, filtering, and CSV reporting, validating authorization and business rules across ADMIN and STAFF workflows.

DevScout

Vue 3, Pinia, Hono, Supabase, PostgreSQL

[Live Demo](#) | [Docs](#)

- Designed a layered web architecture using Vue 3, Pinia, composables, and service layers to separate UI, business logic, state, and data access.
- Built a Hono API proxy for GitHub API integration with caching, rate limiting, request tracking, and OpenAPI documentation.
- Implemented Supabase Authentication and PostgreSQL Row Level Security (RLS) to enforce secure user data access and authorization.

CERTIFICATIONS & COURSES

- *Database Design and Programming with SQL* — Oracle Academy, 2023
- *Full Stack Web JavaScript Developer* — ITBOX, 2026
- *Memulai Pemrograman dengan Python* — Dicoding, 2026
- *Belajar Dasar-Dasar DevOps* — Dicoding, 2026
- *Belajar Prinsip Pemrograman SOLID* — Dicoding, 2026

EDUCATION

Universitas Kristen Satya Wacana

S.Kom in Informatics Engineering | 3.64/4.00

2021 – 2025
